BLANK (OMNI-FILL & OTHERS)
**INSTRUCTIONS**

For full details, refer to the Technical Data Sheet.

---

**STEP 1**  
**PREP**

**VINYL & PLASTIC:** Clean first with **SEM Soap** and a gray scuff pad. Rinse with water and allow to dry.

For vinyl, clean thoroughly with **Vinyl Prep** or **XXX Universal Surface Cleaner**, using a clean, damp, lint-free towel and wiping in one direction. For plastic, clean with **Plastic & Leather Prep** or **XXX Universal Surface Cleaner**.

**CARPET & VELOUR:** Shampoo first. Clean with **Plastic & Leather Prep**. Scrub lightly with a nylon bristle brush to separate the fibers and to remove oil, grease and contaminants. Allow to dry, then vacuum.

---

**STEP 2**  
**MIXING**

**DO NOT THIN. ** **Color Coat** is ready to spray.

Shake or stir well, per label instructions, to ensure color uniformity. For best results, use only when can temperature is approximately 70°F (21°C).

For additional versatility when matching low gloss OEM colors, **Color Coat Flattener** is available.

---

**STEP 3**  
**APPLY**

**AEROSOL:** Hold can approximately 6 – 8” from the surface. Apply light coats allowing 5 – 10 minutes between coats.

**SPRAY GUN:** Using fluid tip size 1.0 – 1.3 at 20 – 25 psi with non-HVLP or 8 – 10 psi at the cap with HVLP, apply 2 – 3 light coats or until hiding, allowing 5 – 10 minutes flash time between coats. Some colors will require more coats to cover.

**CARPET & VELOUR:** Spray one light coat and immediately brush in all directions using a nylon bristle brush. Apply a second light coat and brush again. After surface has completely dried, brush again to loosen fibers.
